AMENDMENT UNDER 37 C.F.R. §1.312

MAIL STOP ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In accordance with 37 C.F.R. §1.312, and without withdrawing the application from
issue, please amend the above-identified application as follows:

IN THE SPECIFICATION

Please amend the paragraph beginning at page 105, line 9 as follows:

This concludes the description of the preferred embodiment of the invention. In
summary, the present invention comprises a multistage interconnect network 14 (MIN) capable
of supporting massively parallel processing, including point-to-point and multicast
communications between processor modules (PMs) which are connected to the input and output
ports of the network. The network 14 is built using interconnected 8x8 switch nodes 16 arranged
in $\lceil \log_8 N \rceil \lceil \log_8 N \rceil$ stages, wherein N is the number of input/output ports in the network and
 $\lceil \log_8 N \rceil \lceil \log_8 N \rceil$ indicates a ceiling function providing the smallest integer not less than \log_8
